

For Safe Use

Safety Cautions

Caution!

- Do not disassemble or modify this device. Such acts may result in accidents, fire or electric shock.
- Please be careful not to introduce water or foreign matter inside the product. Such may be the cause of fumes, ignition, or device malfunction.
- If a problem occurs, such as foreign matter entering the device or device exposure to water or smoke, stop use immediately and contact your dealer or a designated maintenance center. Not doing so may result in device malfunction.
- Do not use the device under faulty conditions such as no display or sound. Such may result in accidents (fire, electric shock, etc.) or critical product malfunction.
- When operating this device, do not operate in no-stop or no-parking zones. Such acts may result in accidents.

Safety Warnings

Caution!

- Device operation while driving may lead to traffic accidents. When operating the device, first park your vehicle in a safe place. For safety reasons, some features may be disabled while the vehicle is in motion and enabled when the vehicle is parked.
- This device is a product specifically designed for use in automobiles. To change the mounting position of the system, please inquire with your place of purchase or service center. Installing or disassembling the device requires technical understanding.
- When cleaning the touch screen, turn off the power and wipe it with a dry, soft cloth. Do not use hard cloths, chemical mops or organic solvents (alcohol, benzene, thinner, etc.) as they may scratch or alter the surface of the panel. If any problem occurs with the product, please contact the dealer or service center to take action.
- Do not subject the device to excessive impact. Direct pressure to the front of the monitor may damage the LCD panel and touch panel.
- Operating the device for prolonged periods of time with the engine turned off will display an electrical discharge warning on the screen. Be sure to operate the system with the engine running.

- The product is designed for DC 14V negative-ground vehicle use only. Do not use non-standard power supplies.

- Do not use gasoline, thinner, benzene, or organic solvents, to clean the unit.

Information

The preset memory is cleared to the default factory state when the power connector or battery is disconnected.

Basic Operation

Starting the System

- Press the engine start button once or set the ignition key to the ON or ACC position.

- The Ssangyong Motors logo is displayed and the system will boot.

Turning the System Off

- Press and hold (over 1.5 seconds) the POWER/VOL button to turn the power off. When the system power is turned off, the final operating mode is saved.

- Once booting is complete, the most recent mode will operate. (Default mode is Radio FM1)

- When the power is turned off, the current time is displayed.

Information

- When the ignition is turned on again, the system will automatically turn on the most recently operated mode.

Information

- The system will automatically turn off if more than 3 minutes has passed in ignition off state and the driver-side door is opened.

Restarting the System

- Press the HOME and USER keys simultaneously.

- The system will turn off and reboot.

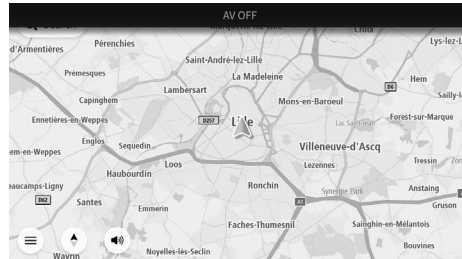

Information

- Resetting the system will restore all existing settings and configurations back to their default states. This is to ensure device stability.

Turning AV Off

- When the AV is on, shortly press (under 1.5 seconds) the PWR/VOL button to turn the audio off.

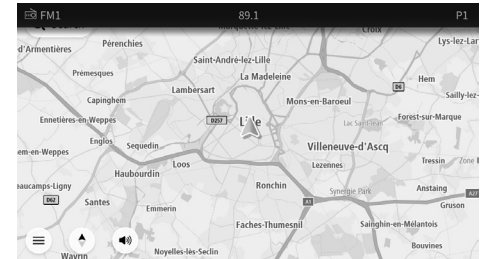

- When the AV is turned off, the most recently operated navigation mode screen will be displayed.

Turning AV On

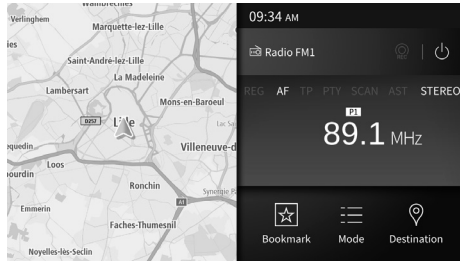

- When the AV is off, shortly press (under 1.5 seconds) the PWR/VOL button to turn the audio on.

- When audio is AV on, the navigation screen is maintained but the most recently operated audio will start playing.

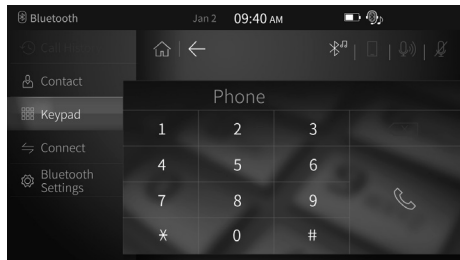

Selecting Hard-Key

HOME

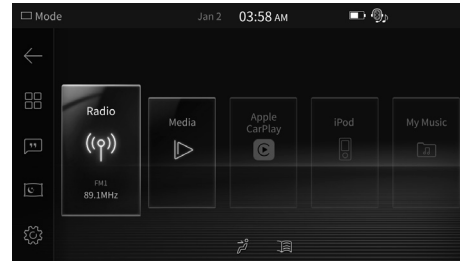

- Press the HOME key to move to the HOME screen.
- In the HOME screen, select the desired menu.

PHONE

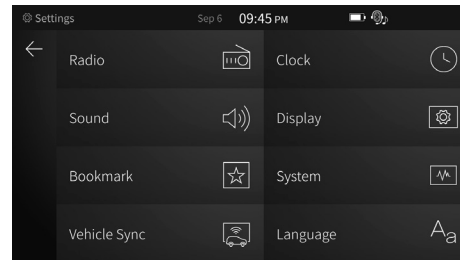

- Press the PHONE key to move to the Bluetooth phone screen.
- In the Bluetooth phone screen, pair a Bluetooth device and make a call.

MODE

- Press the MODE key to move to the Mode screen.
- In the Mode screen, select the desired menu.

SETUP

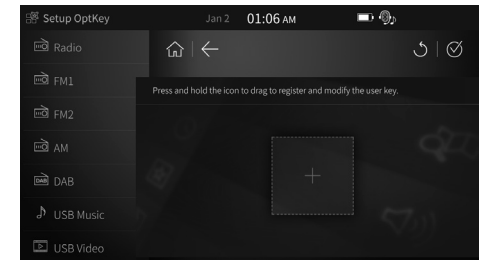

- Press the SETUP key to move to the Settings screen.
- In the Settings screen, select the desired menu.

NAVI

- Press the NAVI key to move to the map screen.
- In the map screen, select the desired menu.

USER

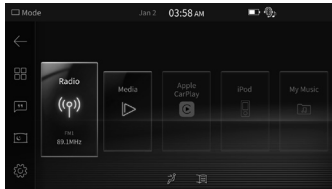

- Press the USER key to move to the registered feature.
- Press and hold the USER key to register the desired feature with his key.

Main Mode

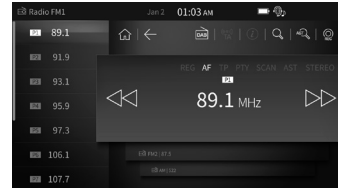

- From the system hard keys, press the MODE key.

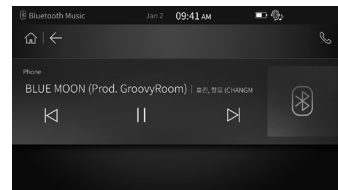

- In the Mode screen, select the desired mode.

Radio

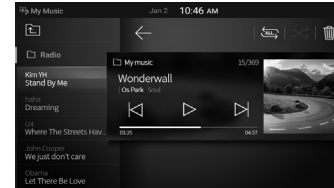

- This feature allows users to play radio broadcasting from FM1/FM2/AM/DAB(EU only).
- In Radio Mode, press the DAB button to enter the DAB mode to listen to Digital Audio Broadcasting.

Bluetooth Music

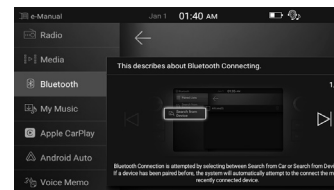

- This feature allows users to play music saved in the mobile phone in the car through Bluetooth audio streaming.
- Users can switch music playback between two connected Bluetooth devices.

My Music

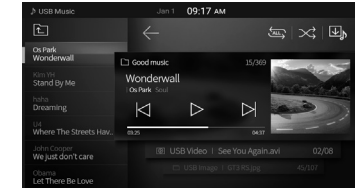

- This feature allows users to play radio broadcasts by saving them using the Radio Recording feature.
- Music files within Media mode that you listen to frequently can be saved to the AVN system to create your unique Music Lists.

e-manual

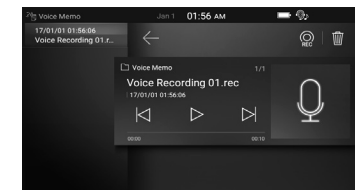

- This feature allows users to check the method of using the key features.
- Select the desired menu from the list on the left-side of the screen and use the left/right buttons to make operations.

Media

- This feature allows users to play music, video, image files in the USB device.
- This feature will not operate unless there is at least one music, video or image file in the USB device.

Voice Memo

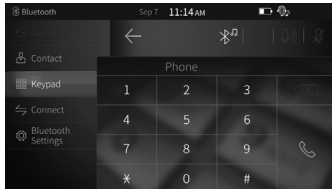

- This feature allows users to make voice recordings.

Information

- Bluetooth multipoint pairing may vary depending on device.

Selecting Mode

Bluetooth Phone

- This feature allows the user to conveniently make phone calls with Bluetooth phones.
- Before you use the Bluetooth feature, you must first pair/connect your mobile phone to your car.

Climate(Optional)

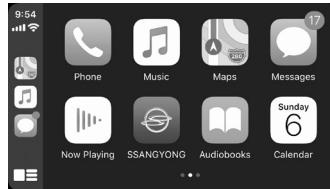

- This feature allows users to check the A/C, heater temperature and fan direction.

Information

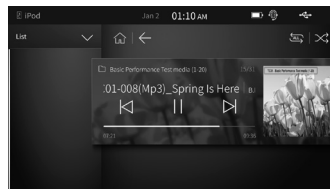

- When connecting USB Cable, use only authentic connection Cable.
- Apple CarPlay is not supported when iPod is in use mode through an iPhone.
- Bluetooth is not available when CarPlay is connected. To use Bluetooth, disconnect the CarPlay connection.

CarPlay

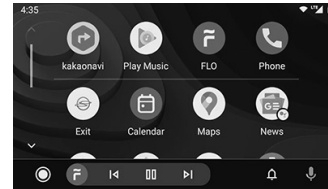

- This feature allows users to connect an iPhone with the AVN system and conveniently to use various features, including Phone, Navigation, Messages, Music, and Siri.

iPod

- This feature allows users to enjoy music by connecting your iPod device with the AVN system.

Android Auto

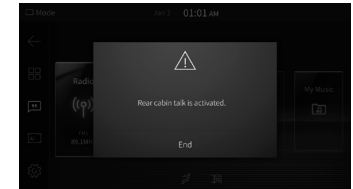

- This feature allows user to connect an Android phone to the AVN system and use various features.

Connecting CarPlay, iPod and Android Auto

Rear Talk

- This feature allows driver to converse with rear-seat occupants through the microphone.
- The AV volume level can be adjusted from 6 to 40.

Rear Sleep

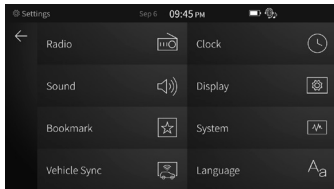

- This feature mutes the rear speakers and allows rear-seat occupants to have rest.
- The maximum AV volume level is limited to value 15.

System Settings

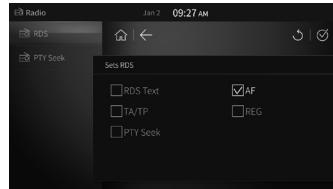

- From the system hard keys, press and hold the **SETUP** key.

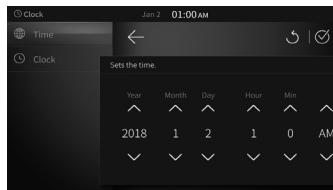

- In the Settings screen, select the desired settings menu.

Radio Settings

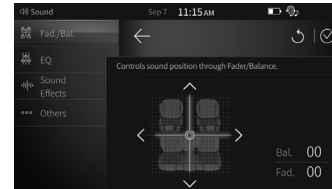

- Used to set RDS and PTY Seek settings.
- Press the **OK** button at the top-right side to initialize the settings.

Clock Settings

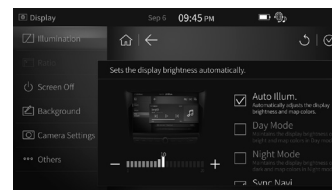

- Used to set the date and time.
- Press the **OK** button at the top-right side to initialize the settings.

Sound Settings

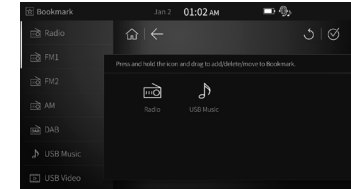

- Used to set sound fader/balance, EQ and other sound settings.
- Press the **OK** button at the top-right side to initialize the settings.

Display Settings

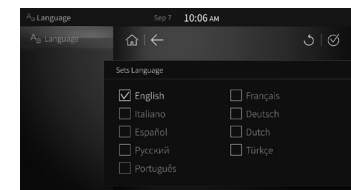

- Used to set the illumination, ratio, screen off, background, and other display settings.
- Press the **OK** button at the top-right side to initialize the settings.

Bookmark Settings

- Used to add, delete or move Bookmark.
- Press the **OK** button at the top-right side to initialize the settings.

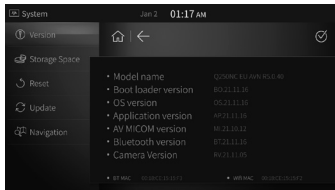

Language Settings

- Used to set language.
- After selecting the desired language, press the **OK** button at the upper right side. The system will automatically restart.
- Press the **OK** button at the top-right side to initialize the settings.

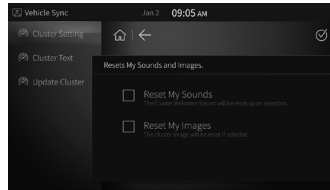

System Settings

System Information

- Used to check system information and Reset/Upgrade the system.

Vehicle Sync Settings (Optional)

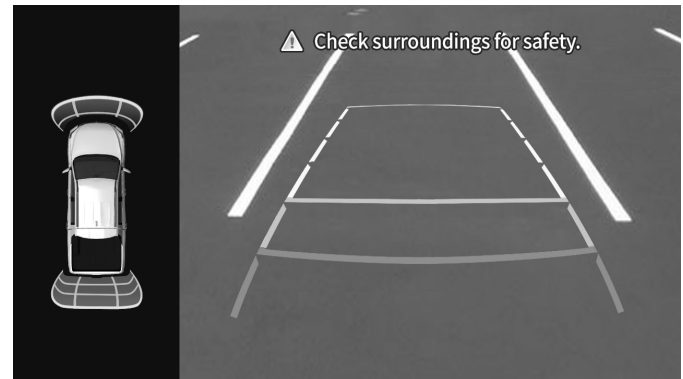

- Used to reset the My Sounds/My Images/Cluster Welcome Text on the instrument cluster and upgrade the instrument cluster.

■ To ensure safety, a rear view camera will operate when the vehicle is driving in reverse.

- When the transmission level is shifted to reverse (R) position, the rear view camera will operate regardless of your current mode.
- The rear view camera will automatically stop operating when shifted to a different position.
- When the rear view camera is operating, it is possible to use the volume and mute features.
- The Parking Assistance System(PAS) feature can be turned on/off within Settings.
- When the transmission level is shifted from reverse (R) to park (P) position, the rear screen will be displayed for 5 seconds and turned off. (This feature can be turned on/off within Settings)

When PAS is turned off

When PAS is turned on

■ Caution!

- The rear view camera screen may appear different from the actual distance. For your safety, always use caution and directly check the rear and left/right sides when backing up.
- When operating the rear view camera, heed caution as the warning text and parking guide lines may make obstacles less visible.

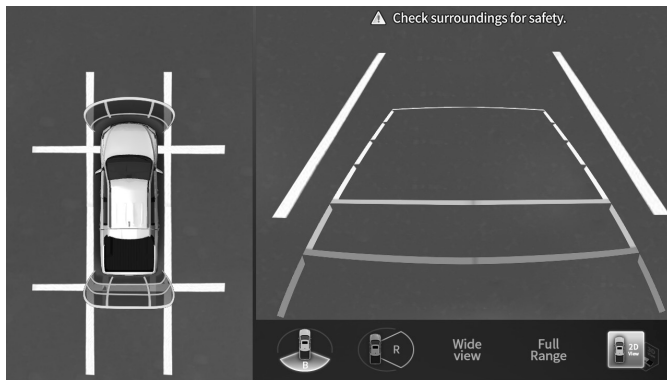

Warning!

- The rear view camera is unavailable during updates. Make sure to park your vehicle before conducting updates and start driving only after the update is complete.
- When the rear view camera is operating, only the volume and incoming call features are supported.

AVM(Around view monitoring) -Optional

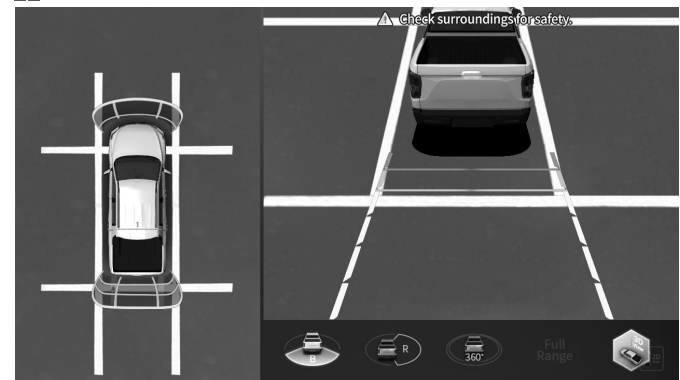

- Pressing the AVM key or shifting to R will switch the monitor into AVM mode regardless of your current mode.
- Pressing the AVM key one more time or changing the gear position in reverse gear automatically switches to the previous operating screen.
- When AVM is operating, it is possible to use the volume and mute features.
- To change between 2D and 3D View modes, use the View Mode features within AVM Settings.
- While AVM is operating, AVM will be automatically turned off when the vehicle exceeds 20km or the hard key is pressed.
- When the transmission level is shifted from reverse (R) to park (P) position, the front screen will be displayed for 5 seconds and turned off. The screen will be turned off immediately, when the hard key is pressed.

2D View

Provides Normal, Wide, Full range view.

3D View

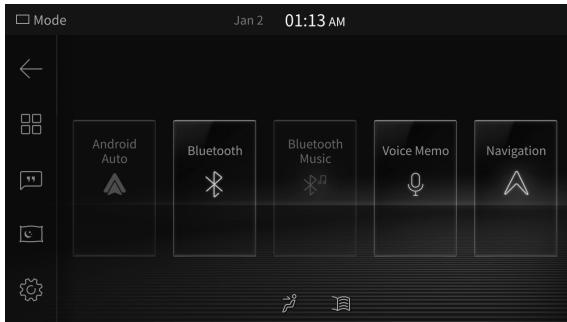

Provides 3D, 360° Around view

Warning!

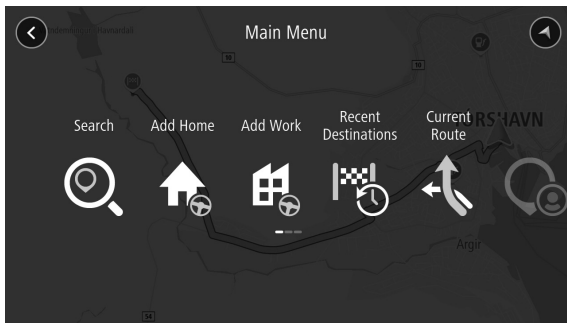

- The AVM screen may appear different from the actual distance. For your safety, always use caution and directly check the rear and left/right sides.
- When AVM is operating, only the volume and incoming call features are supported.

Starting Tom Tom Navigation

- In the MODE screen, press Navigation [] to display the Navigation map screen.
- In the Navigation screen, press [] to display the main menu.
- Map Update
 1. Insert the Micro SD CARD into your computer for Map Update.
 2. Go to Update page (URL) and follow the instructions.
 - Map Update URL : <https://ssangyong.navshop.com/downloads/>
- 'Downloaded maps' cannot be used because the 'internet connection' function is not provided. Please use the website.
- SD card formatted into FAT32 are recommended, and the exFAT, NTFS file system is not supported.

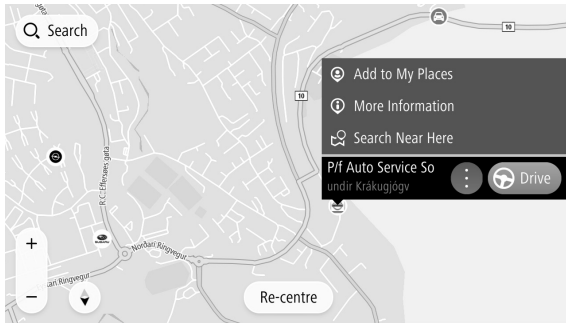

Using Navigation Main Menu

	Displays the keyboard used to search for the place or POI		Displays the saved routes
